

Green roof edge trim

Trim length 2429 mm

Corner piece side length about 200 mm

Height above the roof 87 mm

Flange width 150 mm

Edge trim for finishing green roof eaves

- Made of acid-resistant steel.
- Available with a solid or slotted profile.
- Eave flasing integrated into the edge trim simplifies the installation of the product.
- The integrated guide piece ensures precise alignment and easy installation of trims and corner pieces.
- Waterproofing flange is installed between the bitumen membranes. Flange has installation holes for mechanical fastening.
