

# Negative pressure ventilation pipe

Other heights are made to order.

## Negative pressure pipe for ventilating roof structures

- Prevents the formation of condensation in the roof structure.
- Made of acid-resistant steel or copper.
- Contains a pipe with a flange for connection to the waterproofing membrane and a separate cap.
- Slope and ridge models are available according to the roof pitch.

### Accessories

- Pipe condensation insulation
- Diffusion water cup
- Small animal mesh for the cap
- Powder coating in RAL or RR colours
