

# PITO™ Greenline lifeline system

## Reliable lifeline system to make working at height as seamless as possible

PITO™ Greenline lifeline system ensures a safe and accessible working environment on the roof. Once attached to the cable, the user remains protected along the entire length of the line, without having to disconnect from the system at the cable points. The system is also suitable for other types of work at height, for example indoors, and can be used for personal fall protection during construction work.

- Suitable for flat and steep roofs.
- Up to four simultaneous users.
- Installation between PITO™ roof anchor posts and points.
- Span of the cable up to 15 m, depending on the type of anchor point, recommendation 7,5-10 m or 10-12 m.
- Maximum length of the cable line depends on the type of anchor point, 150 or 250 m.
- CE marked.
- Tested according to personal fall protection equipment standards EN 795:2012 Type A + C and CEN/TS 16415:2013 Type A+ C.
