

PITO™ wooden roof anchor post

Pipe height 200, 300 or 400 mm

Robust roof anchor post for fall protection

- Made of steel, hot-dip galvanised and the pipe is condensation insulated on the inside.
- Suitable for hanging suspended scaffolds and for personal fall protection as a single anchor point or as a cable point of PITO™ Greenline lifeline system.
- Approved for four simultaneous users.
- Maximum live load 5 kN.
- Fastening with anchor rod and a counter plate to the wooden roof structure. Retightening possible from the top of the anchor post.
- Fasteners are supplied with the anchor post.
- Painting is available for the anchor post through Peltitarvike.
- Tested according to suspended access equipment standard SFS-EN 1808 + A1 and personal fall protection equipment standard EN 795:2012.
- PITO™ anchor posts have a Kiwa Inspecta certification for construction products.
