

Scupper drain for industrial roofs

Other sizes can be made to order.

Scupper drain for external rainwater drainage from large roof surfaces

- Made of acid-resistant steel.
- Scupper has primed flange.
- Scupper directs rainwater in a controlled manner through the roof edge structures into a hopper.
- Hopper collects rainwater from the scupper and directs water into a downpipe.
- Hopper has overflow opening.

Accessories

- Scupper grate
- Grates for hopper overflow opening and lid
- Self-adjusting thermocable
- Powder coating of hopper in RAL or RR colors
